

Radio Telephone Links

London Will Be Hub Of World Phone Service

"Radio Central, this is London speaking. Will you please connect me with Bombay?"

"Two more radio telephone links from London are expected to come into operation shortly, and taking into account efforts by Germany to put into telephone touch with the Far East, this will mean that the whole world will have been joined up by voice links, with London as the hub of the service."

Work on an extension from Australia to New Zealand has been commenced, and if successful 150,000 telephones will be brought into the international circuit. Arrangements for a service to India are still being negotiated, but once these are made, it is anticipated that the installation of a special transmitter in India will not take more than three or four months.

In the first place, the service will probably be only to Bombay, but extensions will quickly follow to the United Provinces and Madras of the Ganges from Calcutta to the Northwest Frontier. And eventually Burma will no doubt be brought in.

Another country which may be brought into the international circuit at any time is Egypt. Only the word of the Egyptian government is needed. From Egypt there would probably be an extension to Palestine and Transjordan.

Meanwhile the Telefunken Company of Germany is experimenting with a radio telephone link with Tokyo, and if this can be established, arrangements will immediately be made to "switch" London with the Telefunken Company is also about to install a service to Nankin and the remainder of China.

The virtual completion of an international telephone service is thus only a matter of months. Beyond Africa will, of course, be brought into the system, though experiments have not yet commenced. The total number of telephones in the world recorded in the last year was 22,641,150, of which there are now probably 24,000,000, of which over 90 per cent. are connected with one another.

Keeps Thousands Busy

Large Number Employed In British Columbia Salmon Industry

The Department of Fisheries estimates that more than 20,000 people are engaged in this season dependent on the salmon industry of British Columbia. Of this number 15,000 are fishermen and about 5,000 work in the fish-canning plants.

In addition hundreds of employees are engaged by the can manufacturers in camps required to make the millions of cans required by the fishing industry. Up to the present time 40,000,000 pounds of salmon alone have been caught.

Bumper Potatoes Crop

There is a record crop of potatoes in Canada this year. It will total, according to the latest official estimate, 62,000,000 bushels, or 45 per cent. more than in 1929. Potatoes are grown in commercial quantities in all the provinces of Canada. In the Maritime Provinces—Nova Scotia, New Brunswick, and Prince Edward Island—potato growing is an important industry and a large percentage of the crop is exported to the West Indies and the Eastern and Southern States.

Is Of Some Use

Spread of the miniature golf craze throughout the United States, has been a great boon to the electric light companies through the use of approximately 12,000,000 watts of electricity each month, according to figures compiled.

A garage fire in Brooklyn destroyed more than 100 autos. Many families lost everything they had.

"The children who annoy me least in the theatre are those that cry."

"Yes, because they are always taken out"—Gretchen, Madrid.

W. N. U. 1357

A Trans-Canada Airway

Prediction Made By Controller Of Civil Aviation, Ottawa

Hope that before many years have passed Canada will have a transcontinental airway that is second to none, was expressed by J. A. Wilson, Controller of Civil Aviation, Ottawa. While all routes have been established in the east and in the west, said Mr. Wilson, there is still work to be done here and there. "We have the separate lines," he said, "but we will not have the full benefit until the chain is complete."

Already there are 800 miles of lighted airways in Canada, stated Mr. Wilson, for night flying, and 300 more miles are being added this year.

Reviewing flying conditions in Canada, Mr. Wilson said that the pilots, who practically unknown to the public, are making outstanding contributions to national development in flying in the north country. "I hope," he said, "that a new flying will arise and write the story as it goes."

Canada, he noted, has not been gaining fame for breaking world's records in aviation, or for spectacular flights. "In fact," he said, "our fellows are also breaking records, but you don't hear anything about them, because it is done in the ordinary course of the day's work."

Referring to the mail service, Mr. Wilson stated that mail taken from the boats at Rimouski, is placed in Chicago before the dock loads in Quebec. "There is no reason why we should not take the mail off further down and save an extra day. This is perfectly practicable."

Object To Red Barns

Wisconsin Man Shares Cost Of Painting Them Other Colors

Farmers in the country around Janesville, Wisconsin, must have been pleased when their rich neighbor, Mr. George S. Parker, called with an offer to paint their barns red. The offer was not yet accepted, however, and other outbuilding. He wanted the general approval of the country-side improved, and proved his desire by proposing to give part of the cost of painting to all farmers who would join in the beautifying movement. The offer was painted their barns any color other than red, he offered a larger proportion of the cost than to those who chose red.

It was not long before the landscape was dotted with white barns. The reason for the change was not the other color suggesting itself to the farmers as a possible substitute for the familiar red, but as soon as a half dozen barns had turned pale, there was a protest from another resident of the locality. Mr. F. L. Wright, an architect, spoke up for red. He said there ought to be a law requiring red for barns, and he drew up a bill to that effect. He had a local paper, declaring that "a farmstead is warmed and given life by the red of the barns as they stand over the hills and yellow fields."

If the strongest feeling in the community now supports Mr. Parker, it is not for the red barns but for the financial support of white ones. The two leaders are not really bitter in their attitude on the subject. Mr. Parker has sent for a noted designer to give an opinion, and insists that red barns are a curse on Wisconsin's landscape.—New York Times.

The Honey Crop

Show Satisfactory Increase Both In Volume and Value

Honey production in Canada, despite lowering prices average, shows a big increase in both volume and value. Much of this increase has been due to the help provided agriculturists through the research work of the Bee Division of the Dominion Department of Agriculture. In 1927 the nine provinces produced a total of 21,164,483 pounds of honey, which, selling at an average price of thirteen cents a pound, was worth \$2,751,581. In 1928 production amounted to 30,878,735 pounds. This sold at an average price of eleven cents a pound, giving a crop value of \$3,402,357. Ontario is the largest single producer of honey, the 1928 crop amounting to 1,500,000 pounds, while Prince Edward Island produced only 14,000 pounds.

Quest For Superfluous

The conjurer's turn had not been going too well. The audience received each trick in stony silence.

"Not to be daunted, however, he stuck steadily to his task."

"Ladies and gentlemen," he said, "if any person will oblige me with an egg, I will perform an amazing disappearing trick."

Nobody seemed to produce the article, and after a momentary silence a voice called out from the gallery:

"If anybody 'er 'ad an egg, you'd 'ave got it long ago."

London's Technical Schools Are Efficient

Tuition In Every Known Subject Can Be Given

London is rapidly becoming the best educational center in Europe. Tuition in every subject can be obtained in its well-equipped technical and trade schools.

The London County Council has just appointed a visiting instructor to teach the theory and practice of maintenance and face management to hair-dressing students.

"You cannot name any subject we do not teach," said an L.C.C. official to a press representative.

"Jewelry? We teach all about the polishing and cutting of stones, the ways of setting rings and brooches, and every aspect of the craft."

"Do you know that 25,000 Londoners study such subjects as psychology, astronomy and high-brow literature? London is an intellectually curious city, more so than anywhere else."

"Aeronautics? Well, we don't teach flying, but we study air engines and their maintenance and repair, and also the building of aeroplanes bodies. There are also flying schools in London—the trade schools, then, for hobbies and these for the study of aeronautics, and the study of the trade schools end in fit boys and girls for their right vocations."

"We work in conjunction with the trade unions and employers, and of girl and few boys who have learned a skilled trade at one of our schools are unemployed at present."

Life In Village Or Town

Conditions Are Very Often Better Than In Big City

We are sometimes tempted to wonder why it is that so many people, for obvious advantages of village, or even town, life, are not more numerous. In a period of scarcity and depression. Instead, they crowd into the large cities where thousands have crowded before them. It is not, however, as if a living is to be found anywhere. It will be in the great centres of population. Cheaper living conditions, food, fuel, and sometimes, also, certain types of clothing—are not the only advantages of village life. There are opportunities for turning the honest penny that do not exist in the city.

China Wants Leather Goods

Demand for leather in China within the near future, which should open a market for Canadian manufacturers, has been reported to the Department of Trade and Commerce by L. M. McGraw, Canadian trade Commissioner at Shanghai. The deplorable condition of the country and the continued decrease in the price of silver has resulted in the loss of the leather industry. Leather throughout the country, and heavy replacements will soon be required.

A Puzzle To Doctors

A girl who cries at jokes and laughs in time of trouble has been puzzling the doctors of Bordeaux, France. They believe that she has inverted muscles, which the medical men say, they cannot cure. Apart from this peculiarity she is normal. But when her face is tear-stained her eyes register amusement, and when she smiles they reveal happiness.

Over-Production

A Peculiar Situation Wherein Want and Abundance Exist Side By Side

What's the matter with North America? Here the condition exists that multitudes are idle and hungry because there is over-production of foods and everything else. Want and abundance exist side by side. Want to be fed, the consequence of abundance.

There is an immense supply of wheat, but many of these, abroad and at home, why need it cannot afford to buy it. Of manufactured goods more have been made than can be sold.

Some scarce much of the trouble, in so far as Canada, at least, is contributed to depression, and they attribute the depression to loss of confidence. The stock market collapse laid a large and enterprising section of the people limp and dispirited. Relying on the installment plan has enabled all kinds of manufacturing to expand. People can buy almost anything by paying 10 per cent. down.

The article so purchased was a practically good article sold as if it had been paid for in cash. The sales department of a factory sold the job of the collections department to collect. There could, therefore, be 10, 20, 30 times the producing and selling that there would have been if the installment plan of paying had not been introduced. It may be that this is where "depression" sets in to work. People who have lost confidence will not pay down 10 per cent. and obligate themselves to the other 90 per cent. at so much per month. And once the open-handed, confident, installment buying ceases, over-production manifests itself instantly and piles up the cars of a long railway train after the engine has collided with an immovable object.—Toronto Star.

Tip For Beekeepers

Combs Can Be Used Again After Honey Is Extracted

When a beekeeper takes funds or is not in a position to purchase the normal number of supers and frames for his apiary, he may use the combs after the honey has been entirely removed from them. The honey should be taken from the combs as carefully as possible leaving only a day's worth of honey. The bees will adhere to the inside of the cells. These wet combs should be returned to the colony, needing no more than a good cleaning. Wet combs attract the worker bees and at once they will begin to store honey in them if the next flow is there. The jagged top tops of the cells made by the uncapping knife will be gone over by the workers and soon made neat and even. At the end of the season surplus of empty wet combs may be cleaned before storing them for winter.

Many Trees Distributed

The number of settlers visited last year, by the inspectors of tree plantations, was 12,012, of whom 1,324 were in Manitoba; 7,771 in Saskatchewan, and 3,717 in Alberta. The total number of trees distributed by the Forest Service, Department of the Interior, since the inauguration of the scheme, in 1901, is 116,782, of these, 17,831 were conifers, and the remainder broad-leaved.

Honor Goes To Columbus

Even If Norrman Reached America First As Reported

Plenty of people who aren't too certain about anything else are pretty sure that Columbus was Columbus who discovered America, and some of them believe it was in 1492. It is going to be pretty hard on them if Capt. Donald Macmillan, American explorer just back from his fifteenth voyage north, is right in his opinion that the Norsemen anticipated Columbus by four hundred years.

Macmillan says there are all sorts of traditions to that effect among the Eskimauts of the Labrador coast, and it is along that coast that he intends to do some prospecting himself in quest of traces of these Norse discoverers.

Heron of Alexandria undoubtedly came on the principle of the steam-engine more than two centuries before Christ, but he did nothing about it, and James Watt seems to deserve any credit accruing under that head. The Norsemen may have anticipated the principle of the steam-engine, but they did nothing to make it count. So there is really nothing in rocking cradles of olden times. The body ever finally demonstrates that the Norsemen were here first, it will be more than eight hours a day of the with the wonderful opportunity chance committed to their hands.—Edmonton Journal.

An Underground Garden

Flowers and Fruit Grown Quickly Under Ultra-Violet Ray Lamps

The King and Queen recently visited a cellar at Cumberland Lodge, Windsor Great Park, where Lord and Lady Fitzalan have a wonderful underground garden. By means of two ultra-violet ray lamps and a most specially prepared soil and fertilizers, flowers and fruit are grown in perfect perfection in a remarkably short space of time. Mr. Ferris, the head gardener, told the King and Queen who were amazed at the results obtained, that they had difficulty in getting the flowers to bloom in January and as many strawberries as they required by March 15. The plants are kept at a moderate temperature, and the flowers and fruit are seldom given more than eight hours a day of the ultra-violet rays. It is stated that there are only two similar gardens in existence—one in Japan, and the other in New York.

A Big Service

The Department of Agriculture at Ottawa through its Publications Branch last year distributed to farmers all over Canada free of charge a total of 4,361,370 publications, bulletins, circulars and reports. In addition to this material 296 press articles and 188 magazine features were supplied. This is one of the ways in which the farmer is helped with his problems and kept in close touch with the condition of his markets and important new developments in agriculture.

Undesirable Boat Tested

Tests of the new "unsubmersible" over Lake Constance, Germany, are declared to have been successful. The boat resembles a cross between a dirigible and a submarine. It is divided into six water-tight compartments, with a water-light cabin on top of them. A weight below helps to maintain stability.

Experiment Should Be Interesting

Northern Saskatchewan Schools Trying Experiment Which Has Real Value

An experiment in education is being made in certain high schools in Northern Saskatchewan that appears to have real value. The experiment is being carried out by the general public.

The experiment has to do with the use of some guidance for high school age boys and girls in relation to their future life task. Certain enterprises are being set out to recognize the opportunity of the high school in this matter and to meet a need that anyone who has to do with older boys and girls knows well exist. One principal has outlined a scheme whereby local representatives of various trades and professions will speak on the profession to which they belong and indicate its opportunities and the way in which it can be entered. In this manner boys and girls will gain some idea of the work and promise for usefulness of the leading vocations and should be led to select a life task that will afford satisfaction in later years.

There can be no question of the character of the effort, and the minds of bright boys and girls as to the best way in which to invest their education. The experiment is a mistake for education to equip them for the future and then leave them to the whim of the market. It is a mistake for education to trade or profession to enter. Often it means a mere opportunity without any real relation to the fitness of the one concerned. This leads to casual employment and even to unemployment and tragedy. The unskilled worker is usually the first man to be discharged in hard times and also is usually the man with the least resiliency to overcome a disaster.

An innovation of this nature would seem to merit encouragement. Principals of secondary colleges, colleges and high schools might consider what can be done in this regard.—Hogans (Evening) Leader-Post.

Some Horse Facts

Interesting Details Of The Cost Of Providing Feed For Animals

The report of the Dominion Animal Husbandman, Federal Department of Agriculture, furnishes the following interesting details on horse costs: It took an average of 301.05 to keep 100 horses one year during which they consumed 101,034 pounds of oats, 5,786 pounds of corn, 105,678 pounds of hay, 10,494 pounds of carrots, and 180 pounds of salt.

With maintenance added to feed these 10 horses cost \$285.32 each for the year.

It cost \$29.69 to raise a filly born the first year, and \$46.45 the second. Feeding five foals a period of nine months cost \$29.22 each.

A Strange Diet

When tea was first introduced into England, the people were sometimes puzzled as to the preparation of it. As an instance it is recorded that a lady of Penrith, having been sent a pound of tea, and not knowing how to use it, boiled the whole up in a bottle, she then sat down with some friends to eat the leaves with butter and salt. They wondered afterwards how such a diet could appeal to anyone.

Increase In Floral Business

At the second annual meeting of the Medicine Hat Greenhouses, Limited, it was pointed out, in the directors' report, that while it would be reasonable to expect the flower business to be amongst the first to suffer in a period of financial depression, there had actually been an increase in the volume of sales by the company.

First inventor: "What are you working on now?"

Second: "Perpetual motion."

First: "What's the matter with the installment system?"

It isn't what he man stands for, as much as what he falls for.

Fastest Steam-Driven Giant on Wheels

The fastest steam-driven giant on wheels ever to make its appearance in Canada, the Hudson locomotive, 5700, was released September 16, from the shops of the Montreal Locomotive Works, to haul the world's fastest train, "The International Limited," at the Canadian National System, from Montreal to Chicago. This is the first of a family of five. The remainder will be delivered within a month.

To keep to schedule, 5700 will sometimes have to travel at the rate of 90 miles an hour. Its driving wheels are 60 inches in diameter, the largest in Canada. The drivers of the monster 6100 are seven inches smaller in diameter.

From end to end, the new Hudson is 92 feet and three quarters inches long and weighs, engine and tender, more than 321 tons. The water and coal capacity of the tender is greater than that of any other locomotive in the world. It weighs 1,000 tons of coal will be carried and 14,000 imperial gallons of water. The boiler pressure is 275 pounds; the maximum tractive power, without the boiler, 43,500 pounds; with the boiler, another 10,000 pounds may be added.

It is expected to add to speed and power in the 5700, and for the sake of appearance as well as for other essential, this locomotive has many features. "Trimming up" has resulted in the elimination of the sand domes and the placing of the sand chamber inside the smoke box, and in the concealment of practically all piping, particularly that above the running board. The jacket is of polished steel, while the other parts of the locomotive and the tender are dark.

Handrails are of stainless steel, and the remainder broad-leaved.

PLEASURE

The tingling taste of fresh mint leaves is a real treat for your sweet tooth.

WRIGLEYS
Affords people everywhere great comfort and long-lasting enjoyment. Nothing else gives so much benefit so small a cost.

It is a wonderful help in work and play—keeps you cool, calm and contented.

WORLD HAPPENINGS BRIEFLY TOLD

Canada has twelve factories for the manufacture of macaroni and the annual production has a value of about a million and a half dollars, according to the latest figures from Ottawa.

Premier James H. Scullin, of Australia, making his first appearance before the League of Nations Assembly, denounced armaments as a menace to peace and urged the League to call a general disarmament conference.

A cable received by the Child Welfare, Inc., New York, from its administrative committee in China, said 5,000 children are dying as a result of famine and that war and communism are adding difficulty to the situation.

The committee which will administer the War Veterans' Allowance Act, was appointed by the late Federal Government, and its personnel now preparing for the operation and administration of the act.

The superannuation of E. R. Cameron, K.C., as registrar of the Supreme Court of Canada, was announced at the Prime Minister's office at Ottawa. He is succeeded by James P. Snelke, K.C., a lawyer of Ottawa.

Portage la Prairie, Man., known for its No. 1 hard wheat, has added new laurels to its brow. On the farm of J. Prout, one mile from the town, peanuts and almonds have been produced this season. He grew two sacks of peanuts and a few palatial of almonds.

James C. Brady, former Conservative member of parliament for Skeena, B.C., has been appointed a census commissioner of the demography branch of the Dominion Bureau of Statistics. Mr. Brady will organize the census of institutions such as hospitals, asylums, penitentiaries, and house of refuge all over Canada.

New Market in Egypt

Trial Shipment of Apples Being Made From Okanagan Valley

A new market for British Columbia apples in Egypt is being opened up by a trial shipment there, under arrangements completed by the provincial department of agriculture.

This shipment will consist of 2,000 cases from the Okanagan Valley at a price to net the growers a profit. The return will be in the form of a domestic market but satisfactory in an export market. The agricultural department believes that Egypt will offer a large market for British Columbia fruit in the future and is anxious to cultivate this business. A few apples from this country have found their way into Egypt before, but the market has never been built up in a big way.

"My wife used to play the piano a lot, but since the children came she doesn't have time."

Mrs. M. Milner, aged 66, is still busy making cane seats at Wycombe, England.

Scenic Automobile Route

Endorse Lake Superior Route For Trans-Canada Highway Through Northern Ontario

At a meeting of representatives of the Port Arthur and Port William city councils and chambers of commerce, held in Port Arthur, and addressed by John Lang and H. A. Gibson, delegates from Bault Ste. Marie, a resolution was adopted, approving of the Lake Superior route for the proposed trans-Canada highway through northern Ontario.

The meeting was unanimous and accepted the view that while the cost per mile of construction might be slightly higher, the aggregate cost, because of saving in distance, would be considerably less than for the proposed alternative routes further to the north, and felt also that it would open up a scenic route second to none on the continent.

It was further believed that with a time saving of one day over any other possible route for such tourists as would make the circuit, it would be a much greater attraction for visitors from the south.

In order to get action on the matter, the Port William Chamber of Commerce some time ago adopted resolution, approving a compromise route which would touch Cheltenham, and Oba, considerably to the north and adding 145 miles to the 475 miles between Port Arthur and the Soo.

Representatives present at the meeting said the Port William Chamber of Commerce would almost certainly be willing to reconsider the matter and join Port Arthur and the Soo in urging the all-lake shore route.

COLLEGE DAYS

All Tingry models are created and sketched in Paris and the patterns are made in New York.

Are you needing a cute little dress for return to class, or may be your best? Here's a darling style, so fresh and chic!

With the new bolero jacket, the dress is held by simple shoulder straps. One of the new season's closely woven jersey tweeds would be lovely for this model—the collar and cuffs are piped. Plain or spotted crepe could be used or almost any dress weight woven of the plain or tweed variety.

For afternoon-wear, the model is charming designed in maroon. Flared, or brought down to an embroidery or contrasting silk or satin.

The belt is leather or suede. This pattern may be obtained in sizes 14 to 20 and 24 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully for pattern, price list, and full address, the number of the pattern and the size you want.

Children's Colds Best Treated Externally

Stop them over night without "dosing"—rub on at bedtime

VICK'S VAPORUB

OVER TEN MILLION JARS USED YEARLY

School For Fin Fun

Mining Town, In Northern Manitoba Town To Have Public School

Efforts of the mining town of Fin Fun to have modern public school instruction this year have at last been successful, according to word received in The Pas. Equipment is now being installed in the glass rooms, and it is expected that work will begin within ten days.

Financial plans are about complete. With grants from the province, the town, and with the aid of the Federal Bays Mining and Smelting Co., grades up to eight will be taught this year. It has been decided to engage Miss Doris M. Foster, of Winnipeg Beach, to teach the primary grades, and Miss Margaret Sulherland for grades three, four and five.

Find Early Coins

Interesting Discovery In Wades Of Gold Coins Minted In 1840

Thirty golden nobles, in perfect condition and apparently fresh from the Mint where they were struck to celebrate the defeat of the French fleet by Edward III, at Sluys, in 1340, were discovered recently on the edge of an ancient road leading from Tullis, Cardiganshire, to the Dovey Estuary, where a ferry in olden days carried travellers across to North Wales.

The coins depict an English warrior breasting the waves and surmounted by the English coat-of-arms and the King's head.

Recipes For This Week

(By Betty Barclay)

MEAT-FAF MUFFINS

2 cups special cake flour, sifted.

4 teaspoons baking powder.

1/2 teaspoon salt.

1 egg, well beaten.

5 cup milk.

4 tablespoons butter or other shortening, melted.

Sift flour, once, measure, add baking powder and salt, and sift again.

Combine egg and milk and add to flour, beating until smooth.

Add shortening. Bake in greased muffin pans in hot oven (400 degrees Fahrenheit) 25 minutes. Make 10 muffins.

BAKED FISH

1 average helping flaked flounder, fresh halibut or whiting.

2 tablespoons butter.

Salt and pepper.

1 lemon.

Grease a plate and lay the fish on it with the skin side upwards. Put in the oven five minutes and the skin can be easily removed. Melt butter in a hot pan, lay fish on it and place in hot oven 400 degrees Fahrenheit, eight to ten minutes. Baste twice while baking. Remove season and squeeze lemon juice over. Serve hot.

Tour To the Orient

Business Men To Sail On Chantler Of Commerce Tour To Japan and China

Several business men of Edmonton and Calgary have already signified their intention of joining the Canadian Chamber of Commerce tour to the Orient, which sails from Vancouver on the "Empress of Asia" on October 18th. The tour will include a visit to Japan and reception by the Japanese Government, and trips to Shanghai, Nanking, Hong Kong and Canton, and the members will be back before Christmas. The tour is not limited to members of Chambers of Commerce and Boards of Trade, but is open to the general public as well.

In many parts of Africa there is a tree which bears large reds resembling huge sausages.

A Shaving Lotion

When mixed with sweet oil, Minard's serves to an after shaving lotion and antiseptic.

Soothers and freshens the skin.

Wins First Prize For Layer Cake

Above is a photograph of Mrs. W. McKenize, 9 Fernwood Park Ave., Toronto, to whom was awarded the first prize for layer cake, at the Canadian National Exhibition, Toronto.

There were a large number of entries of cakes of various kinds and Mrs. McKenize not only won first prize for loaf layer cake, but also for muffins and small cakes. We give below the recipe used by Mrs. McKenize for the prize-winning cake.

Golden Layer Cake—1/2 cup butter; 1 cup sugar; yolks of 6 eggs; 1/4 cup milk; 1 1/2 cups flour; 4 teaspoons baking powder; 1/2 teaspoon of orange extract. Cream butter and sugar, add well beaten yolks and beat again with butter and sugar until very light. Sift flour and baking powder together and add to first mixture alternately with milk. Beat lightly for about one minute, then stir in crushed layer pans and bake. Temperature 400 degrees Fahrenheit. Time about 20 minutes. Put together with lemon filling and ice with boiled frosting.

Lemon Filling—1/2 lemon and 1/2 cup cold water; 1 cup sugar; 1 tablespoon flour. Beat lemon juice and egg together. Add water and sugar. Dissolve flour in water. Cook in a fire stream on the stage. Pour in a fire stream on the stage. Pour in a fire stream on the stage.

Boiled Frosting—Double a cup of granulated sugar in 1/2 cup of water. Wash down the sugar from the sides of the pan, cover and let boil three or four minutes, uncover and beat with a rubber from the stage. Pour in a fire stream on the stage.

Let Boys Choose Vocation The Farmer's Advocate says that the crusade to "Keep the Boy on the Farm" has pretty well spent itself. It was hardly to be expected that it would be a success. All boys born and raised on the farm are not partial to farm work, and some of the best men in other vocations in life in the world come from the farm.

The wisest plan is to permit the boy to choose his own vocation.

Pure Bred Tree Areas Twenty-eight rural municipalities in the Province of Saskatchewan have been established as pure-bred tree areas, which means that these areas have become entirely free of scrub trees.

Calculating machines, similar to those used for tabulating census returns, are also being used in the nautical almanac office to compute daily positions of the moon until the year 2000.

Language Dying Out

Few Inhabitants On Isle Of Man Speak Manx Tongue

The language of the Isle of Man is dying. Visitors to the island this summer who hoped to hear Manx spoken on all sides, have been disappointed. The simple truth is that, out of 50,000 inhabitants of Man fewer than 1,000 have any working knowledge of their native tongue, and of this number probably no more than 100 can lay claim to be really "Manx" people—able to speak only the Manx language.

These Manx men and women who are able to talk fluently in the language of the island are now elderly, so it is doubtful if the Manx language will successfully survive another generation.

The story of the Manx tongue is an interesting one. The language was brought to the shores of Man by Westward-roaming Celts in pre-Christian days, and it lived and flourished until the end of the eighteenth century. In 1764, for example, there were 20,000 inhabitants of the Isle of Man. And hardly any of them knew anything of English. Manx was the only language spoken.

The Manx, indeed, were an individual nation. Their Bibles and Prayer books were printed in their own tongue, their children learned Manx in their schools. In 1840 came the last issue of the New Testament in Manx, and the decline of the Manx tongue seems to date from that year.

Towards the end of the nineteenth century—by which time there were regular and rapid steamship sailings between Man and the mainland—the number of Manxmen able to speak English had grown enormously. The number of people able to speak only Manx had disappeared to 100.

The holiday habit has been the undoing of the Manx language. Every year close on 500,000 Englishmen and Scotsmen and Irishmen holiday there. The native tongue has been unable to hold out against this invasion.

Let Boys Choose Vocation The Farmer's Advocate says that the crusade to "Keep the Boy on the Farm" has pretty well spent itself. It was hardly to be expected that it would be a success. All boys born and raised on the farm are not partial to farm work, and some of the best men in other vocations in life in the world come from the farm.

The wisest plan is to permit the boy to choose his own vocation.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, thus the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease in the confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.

51 Wellington St. W. TORONTO, ONT.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 2 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with piles in my back and lower part of abdomen and feet."

"Now I am glad to say I am a well woman, feel much stronger and younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say."

"I have never heard without Kruschen Salts, will never omit taking my daily dose and more than glad to highly recommend it for the good that it is in it."—Mrs. S. A. Solomon.

"I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Canned Chicken

New Business Is Likely To Develop Into Large Proportions

In his annual report recently published the Veterinary Director General of the Dominion Department of Agriculture calls attention to the increase in the number of poultry processing procedures under government inspection. The past year has seen more meat and poultry in Canada, and there appears to be room for considerable development in the field of canned chicken. Canned chicken made its appearance on the market last year and from the reception accorded it the new business is likely to develop into one of considerable proportions.

Strength Of Canadian Woods

A comparison of strength values of wood of sugar maple and yellow birch show that sugar maple is considerably the stronger in the green condition, whereas after seasoning, they are of approximately the same strength. This is revealed through publication of results of the physical and mechanical properties of Canadian woods by the Forest Products Laboratories of Canada, Department of the Interior.

There is a Manchester sexton who believes in accuracy, as witness this entry: "Died—male, aged three months; unmarried." Which leaves no possible doubt.

Rheumatism?

Quick relief from rheumatic pains without harm:

ASPIRIN

TRADE MARK REG.

To relieve the worst rheumatic pain is a very simple matter. Aspirin will do it every time. It's something that you can always take. Genuine Aspirin tablets are harmless. Look for the Bayer Cross on each tablet.

Interesting Local Items

Mr. C. Rasmussen of Binville, spent a few days in town last week visiting F. Gorgeson.

Oscar T. Swaby, of Alderson, and Miss Florence Carson, a former teacher in that town, were married in Medicine Hat last Tuesday.

Mr. Wm. Fraser, conservative member of the Saskatchewan legislature for Souris constituency, spent last Sunday in town the guest of Ed. L. Stone.

J. W. Mathony has opened up a barber shop in the building on Broadway opposite the Post Office. Mr. Mathony is an experienced barber who has a thorough knowledge of the business.

A good program in keeping with the occasion, is being prepared for the Burns' Concert in Gordon Memorial on Friday evening of this week. Admission: Adult 35c; Children 15c. Dont miss it.

A Bridge and Whist party will be held in St. Ambrose parish hall on Wednesday, Jan. 28th, at 8 p.m. Usual prizes will be given and refreshments will be served, for 25c each. An invitation is extended to all to attend and bring their friends.

Dick Phillips had the misfortune to have his shoulder blade splintered while at his work at the Pressed Brick plant last week end. A large lump of shale fell on him just as he was about to leave the mine. Although the fracture is mending nicely, it will be some time before Mr. Phillips will be able to return to work.

Have Your Name Taken Off The Prohibition Petition

What reasons were given when you were asked to sign the Prohibition Petition?

Many who have signed now regret doing so. They have changed their minds. The facts are different to those given.

Misrepresentation of purpose has been practiced in many parts of the province and the truth puts a different light on things.

You Can Have Your Name Struck Off The Petition If You Like

Write to

W. W. Howe, Secretary,
Moderation League of Alberta, Inc.
10012, 101A Avenue, Edmonton.

and your request to have your name withdrawn will be taken care of through the proper channels. Do this Now.
